

測試登入表單填寫與發送：Test_login_form.pyF..FF [100%]

通過：6 / 不通過：3

可能的錯誤：1，密碼長度小於等於 7

系統機制導致的錯誤：2，重複帳號錯誤登入

抽取共用函數

```
@pytest.fixture
def basic_setting(playwright:Playwright):
    url="https://practicesoftwaretesting.com/"
    playwright.selectors.set_test_id_attribute(attribute_name="data-test")
    return {"url":url}

@pytest.fixture
def login_setting(page:Page,basic_setting):
    page.goto(basic_setting["url"]+"auth/login")

@pytest.fixture
def login_form(page:Page):
    return {
        "email":page.get_by_test_id("email"),
        "password":page.get_by_test_id("password"),
        "submit":page.get_by_test_id("login-submit")
    }

def complete_login_form(login_form,email,password):
    login_form["email"].fill(email)
    login_form["password"].fill(password)

    login_form["submit"].click()
```

test_invalid_length_password

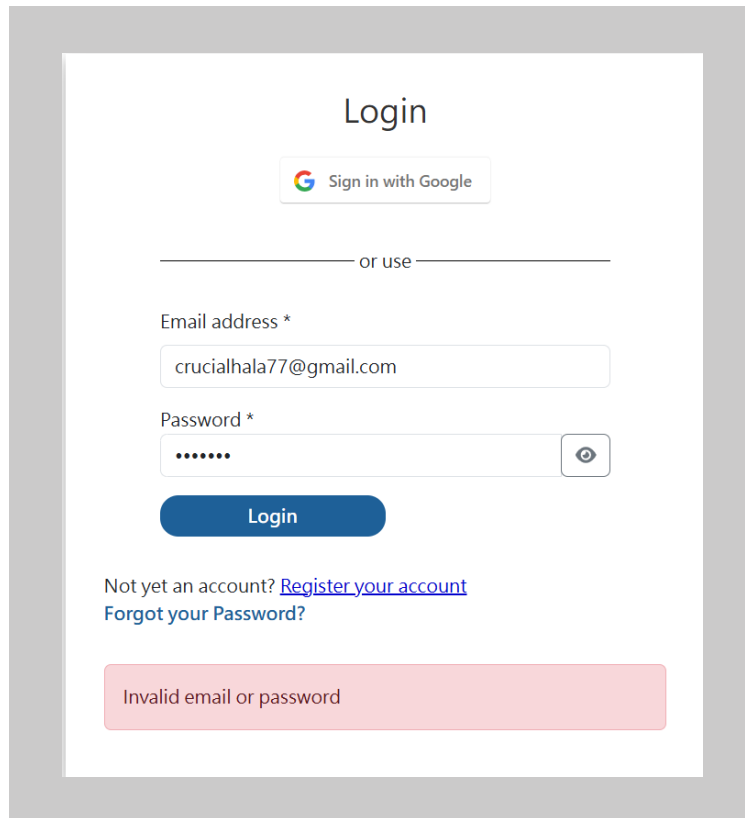

前提，註冊表單的密碼規定為最小長度為 8

因此，斷言當密碼長度為 7 時應該要提示密碼長度錯誤

結果，錯誤提示為非驗證郵箱或密碼

但是，在錄製探索時曾獲得"Password length is invalid"錯誤訊息

```
#10.補在錄製中觀察到的"Password length is invalid" Be at least 8 characters long
def test_invalid_length_password(page: Page,login_setting,login_form):
    complete_login_form(login_form,"crucialhala77@gmail.com","1234567")
    expect(page.get_by_text("Password length is invalid")).to_be_visible()
    complete_login_form(login_form,"crucialhala77@gmail.com","12345678")
    expect(page.get_by_text("Invalid email or password")).to_be_visible()
```

test_invalid_login_data

該測試檔案中總共使用同一個郵箱進行測試 5 次
 後兩次因帳號鎖定被判定測試不通過
 推論，系統允許登入錯誤為 3 次

#3. 郵箱不存在時，彈出非合法驗證資料 "Invalid email or password"

#4. 密碼不匹配，彈出非合法驗證資料 "Invalid email or password"

#7. 密碼後面多打 1 個空白 "Invalid email or password"

#8. 與原來郵箱的大小寫不一樣，彈出非合法驗證資料

#9. 與原來密碼的大小寫不一樣，彈出非合法驗證資料

```
@pytest.mark.parametrize("email,password",[
    ("crucialhala@gmail.com","FV@hala12345678"),
    ("crucialhala77@gmail.com","FV@hala12345"),
    ("crucialhala77@gmail.com","FV@hala12345678 "),
    ("CRUCIALHALA77@gmail.com","FV@hala12345678 "),
    ("crucialhala77@gmail.com","fv@HALA12345678 ")
])
def test_invalid_login_data(page: Page,login_setting,login_form,email,password):
    complete_login_form(login_form,email,password)
    expect(page.get_by_text("Invalid email or password")).to_be_visible()
```
